

Machine Learning Engineering Bootcamp

Capstone Project: Share Your Project with the World

Step 12

Learning Objective

- Demonstrate the ability to effectively present a machine learning project by articulating the problem addressed, detailing the chosen approach, and showcasing the implementation through code and visual aids.

Criteria	Meets Expectations	Weightage
Time Estimate	2 - 4 Hours	
Completion	❑ Share a link to a GitHub repository containing all code for model development and deployment. (1 point) ❑ Share a link to a visual manifestation of the project, whether this be an API, data visualization, or some other interface for interacting with the project. (1 point)	2 points
Process and understanding	❑ Demonstrate a holistic presentation that captures all steps in the machine learning life-cycle from problem statement to solution consisting of a deployed machine learning model users can interact with. (6 points)	6 points
Presentation	❑ A GitHub repository (1 point) ❑ An interface for interacting with the machine learning model (1 point)	2 points
